DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-31 and 35-37, drawn to a patellar prosthesis apparatus, classified in class
 623, subclass 20.2.
- II. Claims 32-34, drawn to a method for implanting the patellar prosthesis, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used in a materially different process. For example the patellar prosthesis may be used as a teaching tool.

Upon the election of Invention I a further election of species is required.

The Applicant claims a patellar prosthesis, which is made up of several parts, including a base and an articulating subcomponent. The Applicant includes several embodiments of the base and the articulating subcomponent; therefore one of each must be elected to make up one embodiment of the patellar prosthesis as claimed in this Application.

The various embodiments of the base are as follows: A referring to Figures 3, 4, 6, 8-11; B referring to Figure 15; C referring to Figures 18A and 18B; D referring to Figures 20 and 21; E

Art Unit: 3738

referring to Figure 24; F referring to Figures 28A and 28B; G referring to Figures 32A and 32B; H referring to Figures 34, 36A, and 36B; I referring to Figures 37 and 38; J referring to Figures 39 and 40; K referring to Figure 41; L referring to Figure 44; M referring to Figures 46A-46C and 48A-48D; and N referring to Figures 49A and 49B.

These disclosed embodiments of the base, A-N, are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have materially different designs as shown in the Figures indicated above. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

The various embodiments of the articulating subcomponent are as follows: 1 referring to Figures 5 and 7-11; 2 referring to Figures 12 and 13; 3 referring to Figure 14; 4 referring to Figure 16; 5 referring to Figure 17; 6 referring to Figure 19; 7 referring to Figure 22; 8 referring to Figure 23; 9 referring to Figure 25; 10 referring to Figures 26A and 26B; 11 referring to Figures 27A-27C; 12 referring to Figures 29-31; 13 referring to Figure 33; 14 referring to Figures 35, 36A, and 36B; 15 referring to Figures 37 and 38; 16 referring to Figures 39 and 40; 17 referring to Figure 45; 18 referring to Figures 47A-48D; and 19 referring to Figures 49A and 49B.

These disclosed embodiments of the articulating subcomponent, 1-19, are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in

Art Unit: 3738

scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have materially different designs as shown in the Figures indicated above. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann Schillinger whose telephone number is (571) 272-6652. The examiner can normally be reached on Mon. thru Fri. 9 a.m. to 4 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on (571) 272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
